

Tropic Biosciences™ | Plant Biology Researcher - Job Advert

About Tropic Biosciences

Based in Norwich (UK), Tropic Biosciences is a leading agricultural biotechnology company dedicated to developing and commercialising high-performing varieties of tropical crops which provide significant benefits to growers, processors and consumers. Tropic's vision is to become a leading seed business with significant ownership of its products from the laboratory to the field, while maintaining constructive relationships with growers and consumers based on transparency and trust.

What we are looking for

We are seeking an experienced Plant Biologist to work in the development of novel and exciting product pipelines. You will work closely with other investigators to answer applied biological questions by performing various experimental procedures and basic computational analyses. Your background must demonstrate a proven ability to work collaboratively to provide high quality research in a timely manner.

Job Specification and Key Responsibilities

Your primary role will be to support the tissue culturing and plants regeneration group. You will contribute to projects at all phases of the pipeline from initial discovery to field trials. You will be comfortable with working in a dynamic, fast changing environment, and able to communicate complex biological mechanisms, methods, analyses and results to scientists from diverse backgrounds.

The successful candidate will have a Ph.D. degree in Plant science. Experience with various plant transformation techniques and tissue culture work of various species is essential. Knowledge/hands-on experience with plant screening, green house trials is highly desirable.

Other highly sought attributes include:

- Postdoc and/or industry experience including Project Management and Line Management skills would be advantageous
- Excellent interpersonal and communication skills
- Ability to work independently
- Strong scientific curiosity and initiative
- Experience in Agronomy

Additional information
